

Project Costing Draft: Requirements List

1. End-User Equipment (Workstations & Displays):

- **Gaming Workstations:** High-spec PCs for the 70 competitive players.
- **Admin/Broadcasting Stations:** Reliable workstations for the 30 administrators and streaming team.
- **Display Systems:** High-refresh-rate gaming monitors for players and large-screen monitoring displays for the admin hub.
- **Peripherals:** Gaming-grade keyboards, mice, and headsets for the player zone.

2. Network Infrastructure (Hardware):

- **Core Router:** High-capacity router to handle the backbone traffic and internet gateway.
- **Core Switch:** Central switch to connect the server farm and distribution layer.
- **Distribution Switches:** Multiple 48-port managed Gigabit switches to provide wired connectivity for 100 stations.
- **Wireless Access Points:** Wi-Fi 6 APs (6 units) to provide high-density coverage for 300 spectators.

3. Server Area:

- **Dedicated Servers:** Physical or high-performance server units for Game Servers, Web server, FTP, and Streaming platforms.

4. Cabling & Connectivity (Installation):

- **Bulk Cabling:** Rolls of **CAT6 UTP cable** for high-speed data transmission (straight-through and crossover configurations) [2148 ‘.].
- **Connectors:** Bulk **RJ-45 connectors**.
- **Networking Tools:** RJ-45 crimping tools and Ethernet cable testers (to demonstrate self-setup skills in the portfolio) [749 ‘.].
- **Internet Subscription:** Dedicated high-bandwidth, low-latency business-grade internet package for the duration of the event.

5. Logistics & Services:

- **Venue Rental:** Facility fee for **Dewan Canselor, UTeM** (including electricity and central cooling usage).
- **Software Licensing:** Game licenses, operating system licenses, and tournament management software.
- **Electrical Setup:** Additional power strips, PDU (Power Distribution Units), and cable management trays to prevent safety hazards.
- **Manpower:** Technical support team and maintenance crew during the setup and event days.
